

Promises Made. Promises Kept.

“CHS supports their hospitals and cares for the communities they serve.”

Dr. Mark Ciminelli, Cardiologist
Springs Memorial Hospital
Lancaster, South Carolina

As a physician at Springs Memorial Hospital, I appreciate the support CHS has shown our medical staff. Over the past ten years, CHS has helped us recruit 90 physicians and made capital investments of more than \$40 million.

Significant enhancements made recently to our Coronary Care Unit allow our patients to receive high-intensity cardiac care close to home. An upgraded cath lab and the creation of a 10-bed coronary unit and 23-bed step-down unit, allows us to double the number of procedures we do annually. Soon all cardiovascular services will be located on one floor, creating a more accessible and convenient work environment for our physicians and support teams, and enhancing the delivery of care for our patients.

CHS supports their hospitals and cares for the communities they serve. I feel fortunate to be on the medical staff of a hospital that values the input of physicians and invests in the resources necessary to provide quality care.
