

Promises Made. Promises Kept.

**“CHS promised us a better hospital
and they delivered.”**

Edna King, Board Member
Southampton Memorial Hospital
Franklin, Virginia

A few years ago, board members at Southampton Memorial realized our hospital was in need of significant upgrades. A desire for a facility that would meet our community’s growing medical needs and enhance the recruitment of physicians led to the formation of a partnership with CHS. In just a few short years, CHS has helped us open a \$17.5 million, 60,000-square foot expansion and renovation that include a larger emergency room, operating suite and radiology department.

We renovated our admissions and registration, as well as the lobby and waiting area and opened 21 new private patient rooms. These improvements make us comparable to any of the larger hospitals in the area and our patients are now receiving the latest in medical technology and treatment—right here in Franklin. This significant renovation helps improve the quality of life for everyone in our community. CHS promised us a better hospital and they delivered.
